

## Code No. 507.3E2 REPORTABLE INFECTIOUS DISEASES

While the school district is not responsible for reporting, the following infectious diseases are required to be reported to the state and local public health offices:

Acquired immune deficiency Syndrome (AIDS) & AIDs-defining conditions	Mosquito-borne diseases
Anthrax	Mumps
Botulism (Including infant botulism)	Pertussis
Brucellosis (Brucella)	Plague
Campylobacteriosis	Poliomyelitis
Chlamydia	Psittacosis
Cholera	Q Fever (Coxiella burnetii)
Cryptosporidiosis	Rabies, animal
Cyclospora	Rubella (including congenital)
Diphtheria	Salmonellosis (Salmonella)
Escherichia coli shiga toxin-producing and related diseases (including HUS and TTP)	Severe acute respiratory syndrome (SARS)
Giardiasis (Giardia)	Shigellosis (Shigella)
Gonorrhea	Smallpox
Haemophilus influenza type B invasive disease	Syphilis
Hansen's disease (leprosy)	Tetanus
Hantavirus syndromes	Tickborne diseases
Hepatitis A, B, C, D, E	Tuberculosis, extra-pulmonary
Human Immunodeficiency virus (HIV)	Tuberculosis, pulmonary and laryngeal (infectious)
Legionellosis (Legionella)	Tularemia
Listeria monocytogenes invasive disease	Typhoid fever
Malaria	Vancomycin intermediate
Measles (rubeola)	Staphylococcus aureus (VISA) and vancomycin-resistant Staphylococcus aureus (VRSA)
Meningococcal invasive disease	Viral hemorrhagic fever (VHF)
	Yellow Fever

Any other disease which is unusual in incidence, occurs in unusual numbers of circumstances, or appears to be of public health concern, e.g., epidemic diarrhea, food or waterborne outbreaks, acute respiratory illness.

NOTE: Be sure to mail the appropriate copies to both the state and local public health offices. School districts must submit a report if there is an absence greater than 10 percent of the school district's enrollment.
