Contributor "Thank You":

Athletes participating in fall sports at Brewer High School pose to say "Thank You" at the new track complex in 2013. The Brewer Community School Athletic Facility was built with support from the state of Maine tax payers and many individuals and businesses who generously donated money, time, expertise, and material. The personal support for this facility made it possible for Brewer to provide a truly first-class facility: one that is better for our athletes than would have been possible otherwise and that attracts regional and state events. The video board featuring the Brewer logo and "Thank you" was generously funded by Doug DeAngelis, a Brewer High School graduate who founded the *FinishLynx* company. *FinishLynx* revolution athletic timing services worldwide.
