

**World Geography**  
**Lesson Plans Sept 24-28, 2018**  
**Mr. Rex Whitworth**

**Objectives**

Students will review and test on the Montana map.

Students will begin their study of the United States and Canada and why it matters and what significance makes them a region.

Students will learn and understand the characteristics in physical features that they both share such as: rocky mountains, great lakes

Students will learn and understand the similarities and differences in culture and lifestyle such as : language, entertainment, religion, food, clothing, government, health care and education

Students will learn and understand the types and where natural resources are located for both countries: coal, petroleum, natural gas, Texas, Alaska, Appalachians, Wyoming, British Columbia and Alberta

Students will conclude the week with a current event that is within the context of World Geography (ie. flora/fauna, culture, and any unique event that sparks interest and learning. This lesson will also fulfill the students weekly writing.
