

Asbestos Management Plan Availability/Pesticide Registration

The Asbestos Hazard Emergency Response Act of 1986 requires annual notification of the availability of an Asbestos Management Plan. Schools are required to have all buildings inspected for Asbestos Containing Materials and develop a plan of management to deal with any Asbestos Containing Materials that may be present or may have been present within the facilities.

Millstadt Community Consolidated School District #160 has an Asbestos Management Plan in place. The Asbestos Management Plan is available to the public for inspection without cost or restriction within five working days upon receiving a written request for inspection. The request for inspection of the Asbestos Management Plan is available at the office of the superintendent of schools during regular office hours. Should a request be made for a copy of this report, the school district is allowed to charge a reasonable cost to make copies of this management plan.

Millstadt Community Consolidated School District #160 has an Integrated Pest Management (IPM) Policy that incorporates building maintenance, sanitation, physical barriers and as a last resort, the safest, effective means of pesticide. Although we have no intention of spraying or fogging with pesticides, in the unlikely event that this is found to be necessary, we are creating a voluntary registration. By putting your name on this list, you are asking to be notified two days before an airborne pesticide application. In the event of an extreme emergency and pesticides must be used immediately, we will notify you as soon as possible. Contact the superintendent's office if you wish to be added to the registry.
