

**World Geography
Lesson Plans Oct 1-5, 2018
Mr. Rex Whitworth**

Objectives

Students will continue their study of the United States and Canada and why it matters and what significance makes them a region.

Students will learn and understand the characteristics in physical features that they both share such as: rocky mountains, great lakes
Section 1

Students will learn and understand the types and where natural resources are located for both countries: coal, petroleum, natural gas, Texas, Alaska, Appalachians, Wyoming, British Columbia and Alberta
Section 1

Students will learn and understand the shared climates and vegetation of the United States and Canada
Section 2

Students will be able to describe the effects of extreme weather in the U.S. and Canada
Section 2

Students will conclude the week with a current event that is within the context of World Geography (ie. flora/fauna, culture, and any unique event that sparks interest and learning. This lesson will also fulfill the students weekly writing.
