

## **Injuries on the Job**

### **Injuries on the Job**

A substitute is covered for worker's compensation. Any injury sustained as a substitute on school property, while in the normal course of duties as a substitute teacher, should be reported immediately to the school principal and *no later than ten days or claim may be denied*. This is done in order to establish a record of the injury. If it becomes necessary for the substitute to see a doctor, a form must be completed by the principal.
