

Bus Assignment Procedure

The following factors are used to figure out what bus goes to what activity:

1. Distance from Glendive
2. Size of the group going (# of passengers)
3. How much and size of equipment needed to take
4. Drivers who are comfortable with the bus needed and their schedules
5. Buses that are most reliable for the trip and which ones are working
6. What Drivers are able to drive that day or weekend
7. What groups are leaving that day or weekend (need to have time to get bus cleaned and ready for the next trip).

All factors are used to come up with the best situation for the day or weekend bus trips. There are a lot of puzzle pieces to put together to make the decision on what bus goes where. We will try and do our best to make sure that all sports/activities are getting the best that we can provide for them. We would love to make this as black and white as possible, but with all of the different factors at play, it is very difficult. The following criteria will always be used to put every sport, activity, coach, and student in the best situation that we can as a district. If there are any questions, please contact the transportation director with questions.
