

## **School Reach**

School Reach is a one call service that allows an administrator to make one phone call and this call will go out all staff, parents, etc whose phone numbers are in our student information system. This system would eliminate the calling tree. We would use this system when we have to let people know we are not having school, having a late start to the day, or having an early out .

The cost of this service is \$795 for one year or \$650 per year for three years (paid up front). This provides unlimited use of this service.

Each "family" in our system can have up to three phone numbers that would be called. This system also uses email and text messages.

I have used this service at my last school and it saves an administrator a lot of time in making the calling tree work and it saves parents from having to hope they can hear their school information on a radio station or a TV station before they have to leave for work or taking their child to school.

One call by an administrator goes out to all phone numbers listed at the same time so everyone gets the same information and at the same approximate time.
