

ADMINISTRATION OF MEDICATIONS TO STUDENTS

Definitions

Authorized Prescriber B Includes a healthcare provider licensed or otherwise authorized by state law to prescribe medication.

Diabetes Medical Management Plan B A document developed by the student's personal healthcare team that sets out the health services needed by the student at school and that is signed by the student's personal healthcare team and parent/guardian.

Medications B For the purposes of this policy, medications include prescription drugs and over-the-counter drugs, including herbal preparations and vitamins. Medications also include substances that claim or purport to be medicinal or performance enhancing, including essential oils.

General

The Golden City R-III School District prohibits students from possessing or self-administering medications while on district grounds, on district transportation or during district activities unless explicitly authorized in accordance with this policy. However, the Board recognizes that some students may require medication for chronic or short-term illnesses to enable them to remain in school and participate in the district's education services. The Board directs the superintendent or designee to employ, contract with and train the necessary personnel to administer medications to students. Medications will be administered at school only when it is not possible or effective for the student to receive the medication at home.

Parents/Guardians are encouraged to submit any relevant information regarding the medications their student needs, including a diabetes medical management plan or other information the district may use to develop an individualized education program (IEP), Section 504 Plan or individualized health plan (IHP). The district will review all information submitted by the parents/guardians and work with them to create a plan to meet the student's medical needs while at school or school activities.

The superintendent, in collaboration with the district nursing staff, will establish administrative procedures for storing and administering medications in compliance with this policy and pursuant to state and federal law.

Nurses and Other Personnel

The administration of medications is a nursing activity that must be performed by or under the supervision of a registered professional nurse (RN). Other district personnel may be required to administer medications to a student as long as they have been appropriately trained and are supervised by an RN. An appropriately licensed member of the nursing staff will be responsible for:

1. Developing procedures for the training of unlicensed personnel in the administration of medications;
2. Devising protocols for the administration of medications by unlicensed personnel; and
3. Training unlicensed personnel in the administration of medications.

District employees who administer medications must maintain documentation of all medications provided to students and stored on district property.

Nurses and other staff administering medications will take precautions when administering medications and, when necessary, will clarify authorized prescriber orders prior to administering medications.

In accordance with law, any trained or qualified employee will be held harmless and immune from civil liability for administering medication in good faith and according to standard medical practices. A qualified employee is one who has been trained to administer medication according to standard medical practices.

Over-the-Counter Medications

to be administered. The prescription label will be considered the equivalent of a prescriber's written direction, and a separate document is not needed.

Medications District Personnel Will Not Administer

Unless required by law to administer a medication to accommodate a disability, nurses who question the necessity of administering a particular medication during the school day may, after consultation with the superintendent or designee, require a written directive by the student's healthcare provider that states why the medication must be administered at school. The district may also refuse to administer any medication for other reasons listed in this policy. The district will not administer any medication that is not regulated by the U.S. Food and Drug Administration.

The district may refuse to administer medications in an amount exceeding the recommended daily dosage listed in the *Physician's Desk Reference (PDR)* or other recognized medical or pharmaceutical text unless the district has verified the dosage with the prescriber. Except for the medications that are used only in an emergency situation, the district will not knowingly administer the first dose of any medication. The district expects parents/guardians to administer medications at home or by coming to the school to administer the medications themselves when possible.

Staff, students and all other individuals are prohibited from possessing or administering any medication that is illegal pursuant to state or federal law on district grounds, on district transportation or during district activities. The superintendent or designee is authorized to obtain a legal opinion from the district's attorney when there is a question regarding the legality of administering any medication.

Medical Marijuana and Cannabidiol (CBD) Oil

The district does not permit the possession or administration of marijuana or marijuana-infused products for medicinal purposes on district property or at district events since these products are prohibited under federal law.

In accordance with state law, parents/guardians with a valid hemp extract registration card may possess CBD oil on district property for the purpose of administering it to their students who are less than 18 years old for the treatment of epilepsy. Students 18 and older with a valid hemp extract registration card may possess CBD oil on district property for the limited purpose of bringing it to the health office where it will be stored with other medications and administered to the student by the nursing staff for the treatment of epilepsy. Students who have an actual

prescription for a medication containing CBD will be permitted to possess and administer the prescription medication in accordance with this policy.

When applicable, district staff will administer prescription medication containing CBD in the same manner used to administer other prescription medication.

Student Possession and Self-Administration of Medications

The district prohibits students from possessing or self-administering medications unless the student is allowed by law to do so and has been given permission in accordance with this section.

A student with an IEP or Section 504 plan may possess and self-administer medications in accordance with the IEP or Section 504 plan. Students who do not have an IEP or Section 504 plan may possess and self-administer medications in accordance with 1) or 2) below:

1. **Students with Diabetes:** Upon written request of the parent/guardian and upon authorization by a student's diabetes medical management plan, the district will permit a student with diabetes to perform blood glucose checks, administer insulin through the student's insulin delivery systems, treat hypoglycemia and hyperglycemia, and otherwise attend to the care and management of the student's diabetes. The district will permit the student to possess on his or her person at all times all necessary supplies and equipment to perform these monitoring and treatment functions. The student shall have access to a private area for performing diabetes care tasks should the parent/guardian or student request such access. Students with diabetes who wish to possess and self-administer medications are subject to the same requirements (below) as students with other health conditions.
2. **Students with Other Chronic Health Conditions:** Students may possess and self-administer medications for the treatment of asthma, anaphylaxis and other chronic

the medication and has demonstrated to the physician or the physician's designee the skill level necessary to use the medication.

The student has demonstrated proper self-administration technique to the school nurse.

The student's parent/guardian has signed a statement authorizing self-administration and acknowledging that the district and its employees or agents will incur no liability as a result of any injury arising from the self-administration of such medication unless such injury is a result of negligence on the part of the district or its employees or agents.

Permission to possess and selfadminister medications may be revisited if there is evidence that the student is not handling or administering the medication appropriately or that the student's actions may be harming his or her own health or the health and safety of others.

Emergency Medications

All student-occupied buildings in this district are equipped with prefilled epinephrine auto syringes, asthma-related rescue medications and naloxone. The school nurse or another employee trained and supervised by the school nurse may administer these medications when they believe, based on training, that a student is having a serious or life-threatening reaction or episode. A prescription or written permission from a parent/guardian is not necessary to administer these medications in an emergency situation.

Epinephrine, naloxone and asthma-related rescue medications will be administered only in accordance with written protocols provided by an authorized prescriber. Naloxone (brand name Narcan) will be administered by nurses and other trained employees to students suspected of having an opioidrelated drug overdose. The Board will purchase an adequate supply of prefilled epinephrine auto syringes, asthma-related rescue medications and naloxone based on the recommendation of the school nurse, who will be responsible for maintaining adequate supplies based on previous use levels and replacing expired syringes and medications.

The school principal or designee will maintain a list of students who cannot, according to their parents/guardians, receive epinephrine, naloxone or asthma-related rescue medications. A current copy of the list will be kept with the medications at all times.

Consequences

FILE: JHCD
Critical

Students who possess or consume medications in violation of this policy while on district grounds, on district transportation or during a district activity may be disciplined up to and including suspension or expulsion. Employees who violate this policy may be disciplined up to and including termination. District administrators will notify law enforcement when they believe a crime has occurred.
