

Community Survey RFP Addendum #1

April 10, 2023

Questions from an interested party and District responses:

1. **We will want to collect from parents of current students, but is there an expectation to make sure we have a goal for parents of current students and a goal for residents who do not currently have a student in the District?** We want representation from the community as a whole - so some of the respondents would not currently have students enrolled in the District.
2. **Do you have a list of current parent/guardian addresses? (If so, this would help decrease costs.)** Yes, we have this list available.
3. **Will the District/Board want someone to present the findings when appropriate?** No - a presentation is not required as part of this project.
