

UNMANNED AIRCRAFTS – DRONES

The following policy applies to the extent not preempted by federal or state regulatory jurisdiction regarding unmanned aircrafts. For purposes of this policy, the term “unmanned aircraft” means an aircraft that is operated without the possibility of direct human intervention from within or on the aircraft.

The Fairfield Community School District believes in maintaining the safety, security, and privacy of students, employees, and visitors. In keeping with this belief, the use or possession of unmanned aircrafts is prohibited on district property or in the space above the property that reasonably can be considered part of the district property.

The superintendent may make an exception to this policy in specific cases where the circumstances warrant such exception. In such situations and prior to approval, unmanned aircraft operators will:

- Supply proof of insurance meeting liability limits established by the district;
- Present appropriate registration and authorization issued by the Federal Aviation Administration (FAA);
- Sign an agreement holding the district harmless from any claims of harm to individuals or damage to property; and
- Meet additional requirements as determined appropriate by the district.

If the unmanned aircrafts are operated as part of the district curriculum, prior to adoption into the curriculum, district employees will work with district administration to ensure the appropriate insurance, registration, and authorizations are in place.

Unmanned aircrafts will be operated in accordance with Iowa High School Athletic Association <http://www.iahsaa.org/> and Iowa Girls High School Athletic Union <http://ighsau.org/> policy. Failure to abide by this policy may result in local, state, and federal penalties if applicable.

CAUTION: Districts should be aware of the FAA unmanned aircraft safety guidelines, which include guidelines such as flying below 400 feet and not flying within 5 miles of an airport unless the airport and control tower have been contacted prior to flying. For a complete list of the guidelines, please visit the “Model Aircraft Operations” section of the FAA website, located at <http://www.faa.gov/uas/modelaircraft/>.
