

GARDNER EDGERTON SCHOOL DISTRICT

Board of Education Committees

Revised: 12.18.2018

INTRODUCTION

The purpose of this committee system is an effort to increase the involvement of board members and patrons in the operation of school district affairs. Most people work better, more enthusiastically, and at a higher level of motivation when they are given a reasonable degree of freedom to act and to contribute. When effective, the participative leadership style of the committee structure can establish a work climate in which the potential power of people is unleashed.
