

**ENCOURAGING NUTRITIONAL FOOD CHOICES/RESTRICTIONS ON SALE OF FOODS**

The Glenburn School Board encourages healthy, nutritional eating habits in our students. Therefore, any food or beverage sold during the school day on school property shall include only those items that contribute to the nutritional needs of students and the development of balanced food choices. Funds from all food and beverage sales during the normal school day on school property shall accrue to the benefit of the school's food service program unless approved by the Principal.

Before and after the normal school day, for in-school sponsored events such as sporting activities, there must be a balance of nutritional and snack foods available.
