## **Personal Devices on the Guest WiFi network**

In order to provide a safe experience for our students, accessing certain sites on our guest network now requires that a certificate is installed. Devices that are issued to the students have the certificate pre-loaded. Personal devices of both students and community members will need to install the certificate for full internet access.

It is only necessary to complete this certificate install one time for each device.

We want you to enjoy your time attending events at our district, so we suggest that you complete the certificate install on your mobile devices before traveling to our campus.

Instructions for installing the certificate on various device platforms can be found at the following location. Alternatively, you can scan the QR code below.
