

BA Goals and Objectives

BA

The board shall endeavor to provide the best educational system possible within the financial limitations of the district.

In exercising their duties in furtherance of this objective, board members will strive to conduct themselves in an ethical, business-like, and lawful manner; to not misuse their authority as board members; and to display appropriate decorum in fulfillment of their roles as board members.

The board serves at the pleasure of the electorate, and, as such, each member will aim to put the interests of the students and community ahead of conflicting interests the board member may have. Board members further recognize that they only hold power over the operations of the district when acting in concert with the other board members and understand that confidential information attained in furtherance of their duties as board members must be protected from further dissemination outside of executive session.

Approved: 7/24/17
