

Ridgedale FFA

# Blue Jacket Journal

October 2018

The 2018-2019 Ridgedale FFA officer team attended Farm Science Review on September 19th 2018. The Ridgedale FFA was one of three schools to be selected to work the John Deere booth. These students spent the day working closely with employees of John Deere from all around the world. They learned about John Deere equipment and the new wave of technology that is in agriculture. It was such an amazing experience to work with such a huge corporation to see how they work from the inside and the extensive amount of jobs John Deere has to offer. Employees shared their highschool and college experiences giving the members of the Ridgedale FFA ideas of how to achieve their future goals. The officer team really enjoyed this experience and are grateful that they had the opportunity.
