Drone Soccer

SUMMER CAMP 2022

Drone soccer is a thrilling indoor team sport played with radio controlled quadcopters in protective exoskeletons designed for collisions.

Five player teams face off, in a netted arena where they ram and block the opposing team to prevent them from scoring. But before pilots can compete they must first learn to build, program, fly, and repair high-performance drones, learning engineering skills towards exciting careers in aviation.

Join our summer camp that will spark your interest in growing careers in aviation and drone technology.
