JOB DESCRIPTION

COMPUTER SUPPORT SPECIALIST III

DEFINITION:

Under the direction of the Supervisor-Computer Installation Support, lead and perform inspection, setup, installation, maintenance, modifications and repairs to computer hardware/software systems, devices, printers and peripherals at an assigned school site; identify, troubleshoot and resolve computer related equipment malfunctions; install and upgrade systems applications software; provide technical support and leadership to teachers, staff and other department computer support staff; train site personnel in the proper use of devices, software applications and computer operation.

DISTINGUISHING CHARACTERISTICS: The Computer Support Specialist III is the advanced-level in the Computer Support Specialist series. Incumbents work at a one to one site or any assigned site as a lead member in a team or independently and perform a wider scope of responsibilities involving greater difficulty and complexity of the analytical tasks. The Computer Support Specialist II is the journey-level in the Computer Support Specialist series and work as part of a team at an assigned school site. At this level incumbents are distinguished from the Computer Support Specialist I, by increased complexity of resources being supported. The Computer Support Specialist I is the entry level classification in the series, incumbents work at the Help Desk or at an assigned school site as part of a team performing more routine functions with less independence.

ESSENTIAL DUTIES AND RESPONSIBILITIES:

- Install computer hardware, including computers, printers and peripherals equipment at an assigned school site; install and upgrade software including operating systems and application software as directed.
- Install, configure and assist end users in use of various computer operating systems and software applications; provide remote assistance and software deployment.
- Provide technical support and leadership to teachers, staff and other department computer support staff.
- Assist with the installation of networking hardware and software including server operating systems and network management software.
- Identify, troubleshoot and resolve computer related equipment malfunctions such as black screens, touch screens, battery issues, connectivity problems, resets and related issues.
- Perform repairs and upgrades to software applications.
- Replace broken or damage devices and computer screens.
- Schedule and perform regular routine maintenance on District computers, printers and peripherals equipment.
- Answer and respond to telephone inquiries; send and receive emails; assist end users in problem determination and solutions on site, remotely and via Help Desk; review and prioritize work orders.
- Prepare and process devices for distribution; maintain accurate inventory of equipment, material and parts; order and install replacement parts for district computers, printers and peripherals.
- Maintain warranty information for all District computer hardware and software.
- Process insurance claims, complete inspection reports, file insurance claims and police reports for lost or stolen computers and related devices; assure insurance paperwork is accurate and filed in a timely manner; ship and receive damaged and repaired devices.
- Check in and check out replacement devices.
- Train site personnel in the proper use of devices, software applications and computer operation.
- Maintain related logs, reports and records of hardware and software serviced, repaired and loaned.
-

- Operate a variety of standard office equipment including a computer and assigned software.
- Operate mobile devices, bar code scanner and applicable operating systems.
- Operate a variety of hand or power tools, switches and network cables; perform equipment tests using specialized equipment.
- Drive a vehicle to various sites to conduct work; maintain database of service calls; respond to regular and emergency service calls.
- Maintain current knowledge of computer repair technology.
- Effectively communicate and maintain cooperative relationships with those contacted during the course of work.
- Attend meetings and conferences as directed; participate in or lead in-services training for other Information Technology Systems staff.

OTHER DUTIES:

- Perform related duties as assigned.

REQUIRED QUALIFICATIONS:

Education and Experience:

- Any combination equivalent to: graduation from high school and four years experience in the installation, maintenance and repair of computer systems, peripherals and related equipment.

Licenses and other Requirements
