

WORLD WATER DAY

Citizen Science Event

When: March 24, 2023

Time: 5:00-6:30 pm

World Water Day (March 22) is a day to highlight the importance of safe water and bring awareness to the world water crisis. This citizen science event will show you how to test your pipes and how to conserve water.

Twenty families will go home with a FREE Water Chemistry Kit!

Facts About Crowd the Tap:

- Focused on identifying and addressing lead contamination in household drinking water.
- They use information about the age of your home and the pipes in your home, to determine your household risk of lead contamination.

Registration preferred, but not required.

All Ages
