

## Policy Development

It is the intent of the board to develop written policies to serve as guidelines and goals for the successful and efficient functioning of the school district.

The board considers policy development its chief function, along with providing for the successful administration, application and execution of its policies.

The board accepts the definitions of policy set forth by the National School Boards Association:

“Policies are principles adopted by the school board to chart a course of action. They tell what is wanted; they may include why and how much. Policies should be broad enough to indicate a line of action to be followed by the administration in meeting a number of problems, yet narrow enough to give clear guidance. Policies are guides for action by the administration, which then sets the rules and regulations to provide specific directions to school district personnel.”

It is the board’s intention that its policies serve as sources of information and guidance for people who are interested or connected with the district.

The policies are frames, and are meant to be interpreted, in terms of state statute, rules of the State Board of Education, and all other regulatory agencies within our local, county, state, and federal levels of government. The policies are also framed, and are meant to be interpreted, in terms of those educational objectives, procedures, and practices which are broadly accepted by leaders and authorities in the public education field.

Changes in needs, conditions, purposes, and objectives will require revisions, deletions, and additions to the policies of the current board and those of the future. The board welcomes suggestions for ongoing policy development.

Action on board policy proposals will be taken upon a recommendation of the Policy Committee. The development of the policy statement shall be the responsibility of the Policy Committee and the superintendent, with final adoption in accordance with board policy and by-laws.

Adopted: October 16, 2014
