

Changing Lives One Call at a Time!

Your Journey Begins Here: Captioning Assistant

Similar to closed captioning that you see on TV, our Captioning Assistants (CAs) provide captions for telephone conversations. The captions are displayed on a CapTel phone, PC, or mobile device.

The captions are provided using cutting edge speech recognition technology (also known as speech-to-text). Instead of typing everything that they hear, our CAs use their voices to repeat everything they hear which is transmitted into text on the display of the captioning device. Some typing is involved.

CapTel® is an Equal Opportunity Employer

About Us

Located in Madison, CapTel® is one of the leading call centers nationwide to provide CapTel captioning support for people with hearing loss. CapTel allows individuals who are deaf or hard of hearing to see word-for-word captions of everything their caller says over the phone through the use of state-of-the-art voice recognition and communications technology.

CapTel is an essential service provider, helping people with hearing loss remain connected over the phone. It's important work. Our philosophy of empowering individuals extends to the CapTel work environment as well, where the atmosphere is casual, diverse, and friendly. Our employees are proud that the work they do - every day - truly makes a difference in the lives of people with hearing loss.
