

I represent an agribusiness in Arena Wisconsin, we have a large need for seasonal summer labor to help collect pollination data from our seed corn fields. I am looking to hire 5-7 students/teachers in the area for summer employment. I was hoping that we would have an opportunity to post a flyer in the school in order to find locals who are interested in making some money over the summer as well as gaining experience in the agriculture field. I have attached a copy of the Help wanted add, please feel free to contact me with any questions.

Thank you,

Ryan Felts
