#### 4. MSTEP Results

Presentation of the MSTEP results from last school year. No action is necessary on this item.

#### 5. LSSU Student Senior Project

“While past studies have focused on understanding how acculturative stress affects the depressive symptoms of minorities, there is little research on the varying effects of participation in cultural activities. Thus, the current study examines how differing amounts of participation in cultural activities interacts with depressive symptoms. Using survey data collected from a high school on a Native American Reservation in Northern Michigan which included closed-ended items regarding individual’s involvement in their native culture and their self-perceptions, this study explores the types of cultural programs and participation that may impact self-perception and depressive symptoms of Native American youth.”

Motion by Loup Supported by LeBlanc to approve the study by Miss Meagan Harman, an LSSU student as presented.
