

Facilities Development  
Facilities Planning and Design

The School District may need to engage the services of an architect, engineer, or land surveyor when capital improvement or other District needs arise. The District recognizes that hiring architects, engineers, or land surveyors who have performed acceptable work for the District in the past promotes continuity, efficiency, and quality. The District also recognizes that a construction contractor retained by the District may wish to work with a particular architect, engineer, or land surveyor with whom it has a solid working relationship. The District will observe the procedures as outlined in Regulation 7120 when selecting architectural, engineering, or land surveying services.

Under this policy, the terms architect, land surveyor, and professional include, but are not limited to, any individual, firm, partnership, corporation or other entity providing architectural, engineering, or land surveying services.
