Exit Criteria and Monitoring for Exited EL Students

An EL student exits EL status when s/he receives an ELPA21 score of Proficient.

When a student exits EL status, the Exit Documentation form is filled out and remains in the student's EL records in his or her permanent file folder. These students will not receive direct ESL services but will be monitored for two years after exiting.

Monitoring

A school's principal and ELA teachers forming EL committee must monitor former EL students for at least two years after they exit EL status. At any time, if the principal and the teachers believe there is a second language acquisition problem, the student may re-enter the ESL program and remain until s/he receives a new score of Proficient on the ELPA21 Summative Assessment. If the student needs to re-enter the ESL program, s/he will need to take the ELPA21 Screener Assessment and receive a score other than Proficient.

The principal and the teachers on the EL committee needs to document the monitoring of former EL students. The counselors print every monitored students' grades each grading period and if there are any grades that are questionable, the principal sends the Exited Student Monitoring Form to the classroom teacher to further investigate and address the concerns.

Where we unleash the potential of every student every day!
