

Q A - ADDENDUM 1
Exeter-West Greenwich Regional School District
RFP 18-19-21

VENDOR	QUESTION	ANSWER	INITIAL
Weidenhammer	1. What application functionality do you need with Chromebooks? Please list all.	Department Heads and Administrators with Chromebooks need access to Budget Building, Budget Balances, Requisitioning, Purchasing Approvals, Time and Attendance approvals, and all related reporting, dashboards, etc.. Acceptable methods of implementation would include Web based access, Remote Desktop Services to run a Windows Client from a terminal or applications server, or an Android App that is available for Chromebook devices. Other end users that have Chromebooks would need access to the employee portal and timecard and attendance solution interface.	JT
Weidenhammer	2. Is hosting an option or is on-site premise installation your preferred solution?	On Premise would be our preferred solution. A hosted option would require full database access for our data in addition to a well formulated justification from the vendor as to why a hosted solution is preferable to utilizing on premise infrastructure we already have in place from a cost/benefit standpoint.	JT
Weidenhammer	3. How many employees need time sheets?	There are 64 hourly employees that require time sheets	BR
Weidenhammer	4. Do you need physical time clocks with badge or biometric technology? If so, how many clocks would you need	The district will entertain options. Options might include apps with geofencing, web or app based manual entry that must have an approval process, biometric scan time clock devices, or utilization our existing proximity access cards for time tracking. At least 7 devices or readers would be required with the potential to add more in the future, and the ability for employees to manually enter time with an approval process would be preferable to employees needing to ask an administrator to manually enter time for them in the event that a time event is not logged.	JT
Tyler	5. With regard to the following requirement, Integration with the General Ledger component and RIDE eGrants Grant Management, can we get confirmation of the desired integration points?	At this time the requirement of <i>2.8 PROJECT/GRANT ACCOUNTING, item a. Integration with the General Ledger component and RIDE eGrants Grant Management System;</i> is being held in abeyance for the foreseeable future.	BR
Tyler	6. Would the district like the pricing to be submitted under separate cover?	Use Appendix A page 1. If a vendor has an alternate pricing proposal they can make copies of Appendix A page 1 and submit the alternate pricing proposal	BR
