

# Memorandum

To: Parents, Guardians, and Staff  
From: Theresa Kallstrom  
Date: 8/31/2022  
Subject: Annual Asbestos Hazard Notification

---

This notice is to inform you that an Asbestos Management Plan has been completed and submitted to the State of Michigan for JKL Bahweting School building where asbestos was found. A copy of the Asbestos Management Plan is available in our building regarding location, condition, and a plan for monitoring and maintaining the asbestos-containing materials.

Once every six months, asbestos-containing materials must be visually inspected for changes in condition and results of these inspections documented in the Management Plan.

Law requires re-inspection of all district buildings every three years. The most recent ongoing three-year inspections were completed 2012, 2015, 2018, and 2021.

Periodic surveillance and regularly scheduled inspections permit JKL Bahweting School to immediately repair any damaged asbestos-containing materials and maintain a safe environment for all students and employees.

As a result of repairs and recent re-inspection, we believe all asbestos-containing materials in our school building to be in safe condition for normal occupancy and do not constitute a health hazard to occupants.

Repairs or Removal:

Repairs have been made to all school facilities as needed per the 3-year inspection and the 6-month re-inspection.

Removal consisted of HVAC expansion joint in school's boiler room. All safety precautions were taken.

If you have any questions, please contact Theresa Kallstrom at (906) 635-5055 ext. 105
