Academic Service/Title 1 Notice

Dear Parents/Guardians:

A common practice used to improve instruction and learning outcomes for students is the use of video recording lessons. The classroom teacher and administrator review the recorded lesson in order to identify lesson strengths and areas for continued development.

There may be occasions when your child's class may be video recorded for this purpose. The recording will be used only for the purpose of professional development for JKL staff. Although the tapes involve both the teacher and the students, the primary focus is on instruction, not the student responses. However, in the course of taping, your child's first name, voice, or image may be present.

Only JKL staff will view these tapes. No last names of participating children will be used at any time. All personal or educational information regarding any child will remain confidential. If you desire that your child not be recorded in class, please obtain and complete the "Do Not Video My Child in Class" Form from the JKL Bahweting School Office.

We appreciate your cooperation with our efforts to improve the effectiveness of our teachers. Please feel free to contact me at 635-5055 ext. 111 at any time should you want to discuss your child's progress.

Sincerely,

Lynn Methner
