Fill in each blank with a true statement.
7. If angles A and B are supplement, and angle B has a measurement of $22^{\circ}$, then angle $A$ has a measurement of $\qquad$ .
8. If $\angle P$ is a right angle and $\angle P$ and $\angle Q$ are supplementary, then $m \angle Q$ is $\qquad$ .
9. If $\angle S$ and $\angle T$ are complementary and $\angle T$ and $\angle U$ are supplementary, then $\angle U$ is $\mathrm{a}(\mathrm{n})$ $\qquad$ angle.
10. If an angle is obtuse, then its supplement must be an $\qquad$ angle.

Find the missing angle measure using any method.
