

**South Wasco County School Dist. #1  
Public Notice**

**Lead Testing our Drinking Water**

**Results of 12/01/16 Report  
OHA Approved Lab – Umpqua Research Company**

South Wasco School District takes the safety of our students, staff and the public very seriously therefore we have tested all drinking fountains, and other faucets in the district for lead contamination using an independent accredited laboratory that could test for parts per billion in our water.

We are very happy to announce that all potable water sources in the district met the Oregon Health Authority requirements for safe consumption.

The district has developed a plan for ongoing testing that can be viewed on the District webpage.

Please see our webpage under District, then Public Notice for more specifics or contact Scott Anderson, Director of Operations at (541)395-2225.
