HomeTech has implemented a new student management system that will assist our school staff in keeping our students safe and accounted for. Our school staff will know in real-time all students coming and going from our campus.

All of our high school and middle school students have been sent a Digital ID via their school email that can be used each time they sign into the school building during the school day (see picture to the right) and when they leave campus.

This Digital ID can be saved on your child’s smartphone using the ‘Wallet’ app or in the photos so that it will be quick and easy to find when you arrive at the school to check in. Elementary students will have a laminated card with their QR code and name. If your middle or high school student does not have access to a phone, we can print them a laminated card to scan. Contact our office if this is your preferred check-in method. They also have the option of entering their 4 digit “quick pin” found with the QR code.

To use this Digital ID when signing into HomeTech, your child will simply open it on their smartphone and scan the ID with the Visitor Management iPad. It is very quick and easy!

We are excited to begin using this new program to increase accountability and also to report to the state the number of hours students spend on campus with us (despite being an “independent study” school.). Ultimately, this helps support our funding streams. Please feel free to call our office if you have any questions at (530) 872-1171 x10.
