## **Introduction to TestNav™ 8: MULTIPLE CHOICE/TEI Document**

The [Introduction to TestNav 8: Multiple-Choice/Technology-Enhanced Item Tests](#) document serves as an introduction to the online navigation, tools, accessibility features, and overall functionality and appearance of TestNav 8. It is highly recommended that teachers (or other adults) read the *Introduction to TestNav 8: MC/TEI* document prior to reading this guide, the *Guided Practice Suggestions*, for the Reading practice item sets.

Reading the *Introduction to TestNav 8: MC/TEI* document will give teachers an understanding of the features of TestNav 8 prior to working with students. In part, the document provides information on:

- opening the practice item sets within the required TestNav 8 Application,
- navigating through the practice item sets,
- answering technology-enhanced items (TEI) and multiple-choice items,
- using the online tools, and
- using the accessibility features available in TestNav 8.

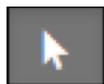

This important information should be used in conjunction with the information found in this guide.

### **Guided Practice Suggestions**

This guide provides specific item information for each question in the Reading practice items. Along with the item information, there are “Guided Practice Suggestions.” This contains information for teachers as they guide students through the practice items. For instance, guided practice suggestions can state, “Use the eliminator tool to place a red ‘X’ on the answers that are not correct,” or, “Make sure students know how to select draggers and place them in the empty boxes using their mouse, keypad, or touchscreen.” Following the suggestions in the table will ensure that students are exposed to all of the different tools within TestNav 8, the different functionality features of TEI, and the common messages that may appear as students complete TEI.

## Online Tools, Features, Icons, and Descriptions of Function

### Pointer

Use to select an answer on screen and to place the cursor in an answer box, plot points, select one or more answers, and drag information from one location to another.

### Answer Eliminator

Use to eliminate (cross off) answer options. This tool functions with multiple-choice questions and certain technology-enhanced items.

### Highlighter

Use to highlight text. Students cannot highlight art, pictures, images, or text when presented as art (i.e. poems, fliers).

There is no limit to the number of highlights a student can make within the test. To access the highlighter, the student selects text and selects the highlighter color. To remove the highlighted text, the student selects the highlighted text and selects the slash. Pink and blue are the two highlighter colors available when the background and foreground settings are set to the default (black text on white background). These colors may change when the background and foreground setting is changed.

### Zoom-In and Zoom-Out Feature

No icons available.

#### On a PC or Chromebook:

Zoom in—press the CTRL and + keys at the same time.

Zoom out—press the CTRL and – keys at the same.

Return to default screen size—press the CTRL and 0 keys at the same time.

#### On a Mac:

Zoom in—press the CMD and + keys at the same time.

Zoom out—press the CMD and – keys at the same time.

Return to default screen size—press the CMD and 0 keys at the same time.

#### On a touchscreen device:

Zoom in—touch two points on the screen, and then move your fingers away from each other.

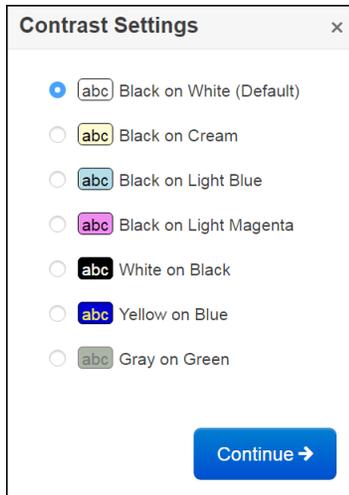

Zoom out—touch two points on the screen, and then move your fingers toward each other.

## User Dropdown Menu

### Change the Background and Foreground Colors

Selecting this permits students to choose the background and foreground colors of their test. The list of background and foreground colors is shown in the screen shot below:

To return the background and foreground color to the default, the student selects Black on White (Default).

### Show Line Reader Mask

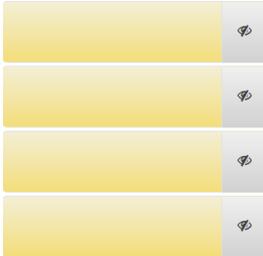

Selecting this will place a mask on the screen that the student may place over text or test questions. The line reader mask has a window, which shows only one line of text. The student must drag the mask down over the text in order to read it. The student can resize the mask and the window. This mask must be selected for each passage or question after the student moves backward or forward in the test. To remove the line reader mask, in the dropdown the student selects *Hide Line Reader Mask*. The line reader mask screen shot is below:

### Enable Answer Masking

Selecting this will place a mask over each multiple-choice answer choice (this is not available on TEI questions). The student may uncover an answer choice by selecting the

gray box with the image of an eye. Once enabled, the answer mask will be present on all multiple-choice questions. To stop the answer choice masking, the student enters the dropdown menu and selects *Disable Answer Masking*. The answer masking screen shot is below:

### Sign out of TestNav

Selecting this will bring up the Exit Test screen. The Exit Test screen permits the student to Exit the Test, or to Cancel the selection and return to the test.

TestNav tools cannot be used to indicate answers to online test items. The Pointer  must be used to:

1. select multiple-choice answers;
2. place the cursor in a box in order to type an answer;
3. plot points on a line, graph, or graphic;
4. select one or more answers; or
5. drag answers from one location to another.

If the student uses a tool other than the Pointer to indicate the student's answer, the Review dropdown will show that question as *Not Answered*. If the student feels that the student did answer the question, instruct the student to go back to the test item to make sure that the Pointer was used to indicate the answer.

A Help menu for the TestNav tools is not available.

			Transition screen announcing the beginning of a passage set.
Reading Passage: <i>Speedy and Spotty</i>	Nonfiction, Informational		If a Reading passage is longer than one page, it will scroll. On a desktop or laptop computer, have students practice using the bar along the right side of the Reading passage to scroll through the passage, as well as the scroll bar on the right side of the screen if necessary. The scroll bar on the far right will only be seen on certain devices and if the computer screen is not in full screen mode. On a touchscreen, use the scroll bar by the passage or move the entire passage with a finger to scroll through it.
1	TEI Hot Spot	Both of these answers must be selected (and only these answers): <i>Quickly; Instantly</i>	A blue box outlines the answer choice when it is selected, indicating a student has chosen that response as an answer. In order to deselect an answer and remove the blue box, the answer choice must be selected again. Have students practice selecting and deselecting an answer.
2	Multiple Choice	D	None
3	TEI Drag and Drop	Both of these answers must be placed in the shaded boxes, and the order does not matter: <i>Helps the cheetah move forward</i> and <i>Helps the cheetah change directions easily</i> .	As soon as a dragger is selected and moved, each receptacle box turns blue and is outlined by a dotted line. This indicates that the dragger can be placed in any box— whichever location the student chooses as the correct location. However, sometimes
