EXPLORE SUMMER
READ ★ LEARN ★ DISCOVER

Defeat Summer Slide at Your Library!

Youth involved in summer activities that include reading, learning and hands-on discovery begin the new school year better prepared for school success than those who are not.

Read, Learn, Discover

Give your student a great start to their summer. Help them sign up for our free Explore Summer program online or at your local library. Students who read 10 hours will receive a free book!

Come to fun and interactive programs focused on science, art, technology and much more. Youth will be learning without even knowing it.

Wondering how to sign up or find a book to read?

Our librarians are ready to help!
