Managing Diabetes in the School Setting

Alabama State Department of Education Alabama Board of Nursing

Diabetes Mellitus: Type I Diabetes

> Pancreas does not make enough insulin (a hormone secreted by the pancreas)

➤ If the body has too little or no insulin then glucose cannot enter the cells of the body to be used for energy

Diabetes Mellitus: Type I Diabetes

- > Symptoms include:
 - Fatigue
 - **❖**Increased thirst
 - Frequent urination

Diabetes Mellitus: Type I Diabetes

> Treatment includes:

- **♦**Blood glucose monitoring
- Administration of long and/or rapid-acting insulin
- ♦ Diet, exercise and rest

Diabetes Mellitus: Type II Diabetes

Insulin resistance

Decreased ability of insulin (a hormone secreted by the pancreas) to move glucose (blood sugar) from our bloodstream into our cells.

Diabetes Mellitus: Type II Diabetes

> Treatment includes:

- **❖**Blood glucose monitoring
- ❖ Diet management and exercise
- Oral medications (Glucophage, Actos, etc.)
- **❖**Insulin

Diabetes Mellitus: Type II Diabetes

➤ Risk factors include:

- **❖**Family history
- **❖**Lifestyle choices (diet, exercise, obesity)

Hypoglycemia (Low blood sugar)

➤ Blood glucose less than or equal to 80 mg/dl **OR** symptoms

Hypoglycemia: Recognition and Prevention

➤ Can occur very quickly

➤ Must be treated immediately

> Prevention:

- > Regular blood sugar monitoring/in classroom if necessary
- ➤ Meals/Snacks eaten on regular schedule/not skipped/in classroom if necessary

➤ Usual symptoms of hypoglycemia:

- Shaky or jittery
- Sweaty
- Hungry
- Pale
- Headache
- Blurry vision
- Sleepy
- Dizzy

Hypoglycemia: Treatment

If student is able to swallow and follow directions, treat with a fast-acting carbohydrate (CHO) source.

- ➤ Mini box of juice
- ➤ 8 oz. carton low or no-fat milk
- $\geq \frac{1}{2}$ can soda (sweetened)
- ≥3-4 glucose tablets

Remain with student until he/she is able to safely resume normal activity.

Hypoglycemia: Emergency

➤ If student becomes unconscious: EMERGENCY

- Student will be *unable to swallow and follow directions*
- ❖ Turn student onto his/her side
- Remain with the student until the on-site School Nurse/Trained Unlicensed Diabetic Assistant arrives OR until EMS arrives
- ❖If no School Nurse of Trained Unlicensed Diabetic Assistant available

- CALL 9-1-1

Hypoglycemia: Emergency

- Treatment of **EMERGENT** hypoglycemia when a nurse or trained UDA is present
 - Administer Glucagon injection (if ordered by physician)
 - ❖Glucagon is a hormone that when injected raises the blood sugar quickly
 - ❖Glucagon *may only be administered* by a School Nurse or a Trained Unlicensed Diabetic Assistant
- >Students must be accompanied by a School Nurse or Unlicensed Diabetic Assistant or Parent if participating on a Field Trip or Extracurricular

Hyperglycemia (High blood sugar)

- ➤ Blood glucose greater than or equal to 300 mg/dl **OR** symptoms
- ➤ *Usual* symptoms of hyperglycemia:
 - ❖Increased thirst, dry mouth
 - ❖ Frequent or increased urination
 - Change in appetite, nausea
 - **♦**Blurry vision
 - Fatigue

Hyperglycemia: Treatment

➤ Can lead to a medical emergency (diabetic ketoacidosis)

>Prevention:

- Regular blood sugar monitoring/in classroom if necessary
- Meals/Snacks eaten on regular schedule/not skipped/in classroom if necessary
- ❖ Insulin/Medications taken on time
- **♦**Exercise on time

Hyperglycemia: Treatment

- ➤ Treatment of hyperglycemia:
 - ❖If student is able to swallow and follow directions, treat with the following:
 - *zero calorie fluid (i.e. water)
 - correction of blood sugars by licensed or trained individuals

Hyperglycemia: Emergency

- ➤ If student becomes unconscious: EMERGENCY
 - Student will be <u>unable to swallow and follow directions</u>
 - ❖ Turn student onto his/her side
 - Remain with the student until the on-site School Nurse/Trained Unlicensed Diabetic Assistant arrives OR until EMS arrives
 - ❖If no School Nurse of Trained Unlicensed Diabetic Assistant available -CALL 9-1-1
- ➤ Treatment of EMERGENT hyperglycemia:
 - School Nurse or a Trained Unlicensed Diabetic Assistant will follow physician orders regarding administration of insulin/medication
- >Students must be accompanied by a School Nurse or Unlicensed Diabetic Assistant or Parent if participating on a Field Trip or Extracurricular Activity

Hyperglycemia: Emergency

- ➤ If student becomes unconscious: EMERGENCY
 - Student will be <u>unable to swallow and follow directions</u>
 - ❖ Turn student onto his/her side
 - ❖Remain with the student until the on-site School Nurse/Trained Unlicensed Diabetic Assistant arrives OR until EMS arrives
 - ❖If no School Nurse of Trained Unlicensed Diabetic Assistant available -
