

Model of the skin: Using play dough Date:

Names:

Use the various colors of play dough to represent the following structures found in the skin. Have the structures labeled (with tooth picks or color code). Then you will present your model to me showing me your parts without “reading” your code.

The structures to include:

Epidermis, Dermis, Subcutaneous, Hair shaft, Sebaceous gland, Sudoriferous gland, Pore, Nerve receptor, Hair papilla, Vein, Artery, Stratum germinatum, and arrector pili

Criteria	10	8	6	0
Has the structures	All 13	Missing 1-2	Missing 3-4	Missing 5 +
Has structures labeled / coded	All 13	Missing 1-2	Missing 3-4	Missing 5+
Presenting the structures	Correctly identified all 13	Correctly identified 10-12	Correctly identified 8-9	Correctly identified 7 or less
Ascetics	Looks great, sharp detail / contrast, looks like the structure	Looks nice, some hard to tell the structure	Looks OK, several structures hard to tell	Poor, hard to tell structures.
