The Edgewood City School District has made a commitment to offer a progressive, competency based online approach to learning that will assist students in receiving or recovering high school credits in an innovative, technology-infused learning setting.

The **Edgewood Virtual Academy** allows students the opportunity to take all of their coursework online. The program can be completed on-campus, off-campus, or a combination of both. The mission of the academy is to assist at-risk high school students in earning their high school diplomas.
