Frequently Asked Questions

I am moving into Nye County School District and my child received special education services at his/her previous school. What do I need to have concerning special education when I enroll my child?

Make sure you notify the school where you are registering your child that he/she has an IEP. When you complete your Online Registration, there will be a spot for you to indicate that your child is on an IEP. Please provide your child's most current Individual Education Program (IEP) to the office. School personnel will then have information to either develop an Interim IEP if you move here from a different state or develop an Annual IEP if you move here from another district in Nevada. In addition, please have the name and address of your child's previous school. This way the school where you are registering your child can expedite the process of obtaining your student's special education records by having you complete a release of information upon enrollment.

If your child has significant disabilities and you need guidance on enrolling him or her in our district, please call Special Education Support Services at (775) 751-4015.
