

# Do you recognize any of these symptoms in your child or any child you know?

- inappropriate laughing or giggling

- difficulty in expressing needs; may use gestures yet will not point

- sustained unusual or repetitive play: uneven physical or verbal skills; spins objects or self

- may avoid eye contact

- may not want cuddling

- echoes words or phrases

- insistence on sameness in surroundings and routine

- apparent insensitivity to pain

- may prefer to be alone; difficulty interacting with others

- inappropriate attachment to objects

- inappropriate response or no response to sound

- no real fear of dangers

Children with these symptoms *may* fall upon the Autism Spectrum Disorder curve. Facts:

Autism is the fastest growing serious developmental disability in the U.S.

A new case of autism is diagnosed nearly every 20 minutes.

1 in 166 children are diagnosed with autism.

Boys are 4 times more likely than girls to have autism.

Early intervention is vital in helping these children realize their full potential!
