

## **Surveying Stakeholders**

RA surveys parents, students and staff on a yearly basis. Parents and staff are surveyed through an online survey system that provides analytics based on answers. Students are surveyed by their classroom teachers using a standard form. The topics included in all surveys are school culture and climate, classroom instruction and programming. Respondents are given an opportunity to provide suggestions for improvement in an open ended format.

Results of the surveys are shared with the staff, parents, the school improvement team, the building leadership team and the Board of Trustees. Action plans are developed around the improvement areas noted. Survey data is compared from year to year to note improvement and/or determine areas which still need to be bolstered.
