

SCHOOL DISTRICT OF WILD ROSE

PROJECT PROGRESS REPORT

JULY 2022 UPDATE

STAFF TOURING HARTFORD UNION HIGHSCHOOL

PLANNING & DESIGN UPDATE

Over the past few months, SD of Wild Rose, along with Bray Architects and Miron Construction, has been active in the design process of the Middle/High School and the Elementary School.

In May, the design highlight was being able to go on tours of other Middle & High School facilities at Hartford Union HS, Mayville HS, and Kewaskum MS/HS. These three schools were chosen specifically as they all had projects in the past 5-7 years that emphasized the areas that Wild Rose is also emphasizing. SD of Wild Rose Administrator Craig Hayes, both building principals and staff critical to specific program areas, all attended the tours.

In June, many of the existing site studies were completed. That means getting a topographical survey, geotechnical borings, and additional studies into existing infrastructure have all taken place alongside design meetings.

In July, the focus was on the design details of the new secure entry sequences, remodeled art, family and consumer science, and technology education spaces. The Elementary School addition layout has been finalized, and Bray Architects is working through the engineering on that building.

WHAT'S NEXT?

- » Looking at exterior design features for the Elementary School Addition and Canopies at the Middle / High School
- » Continued Development in the Middle / High School in specific areas such as Art, Tech Ed, and Family and Consumer Science
- » Interior design updates
