

**HUTSONVILLE CUSD #1**  
**EXTRACURRICULAR RANDOM DRUG TESTING POLICY**

**PHILOSOPHY/PURPOSE**

Recognizing that observed and suspected use of alcohol and other drugs by Hutsonville Community Unit #1 students is evident, a program of deterrence will be instituted as a proactive approach to a safer and drug-free school. The purpose of this program is threefold: (1) to provide for the health and safety of all students; (2) to undermine the effects of peer pressure by providing a legitimate reason for students to refuse to use illegal drugs; and (3) to encourage students who use drugs to participate in drug treatment programs. The program is non-punitive. It is designed to create a safe, drug-free environment for students and to assist them in getting the help when needed.

For the purposes of this policy, the term “students” shall be defined as any student participating in organized athletics, clubs and other extracurricular activities, as well as students possessing a valid parking permit.

**OVERVIEW**

The procedure for initial and random drug testing of students participating in extracurricular activities is accomplished in conjunction with the Random Drug Testing Committee and the Hutsonville Community Unit #1 Board of Education. Our testing services will be provided by an approved vendor, and testing supplies may be obtained through a joint agreement. Specimens will be collected on site for screening, and procedures following will be implemented regarding testing results. Testing will be done randomly at the 9th-12th grade levels during the school year. The Random Drug Testing Committee in conjunction with the Unit #1 Board of Education will make all decisions on testing dates and sample size.

**1. Supporting Data**

Random drug testing of a public student is legal as determined by the United States Supreme Court in the case of Vernonia School District 47J (Oregon) v. Wayne and Judy Acton. On June 29, 1992, the United States Supreme Court issued its ruling in Board of Education of Independent School District #92 of Pattawatomie County (Oklahoma) v. Earls. The Court determined that random drug testing of students participating in extracurricular activities is constitutional. The ruling also stated that testing can be performed before each season or

given reasonable suspicion.

## 2. Definitions

**Extracurricular Activities-** includes but is not limited to school-sponsored activities outside regular school hours or within the regular school day and representing Hutsonville Community Unit #1 where participation is voluntary with no academic credit or grades, does not impact graduation, and may be competitive in nature. These include but are not limited to: athletics, cheerleading, scholastic bowl, clubs and organizations, and those who drive and park at the school with a valid permit.

**Extracurricular Participant-** any student who is trying out for, practicing in an organized practice, or participating in any school-sponsored activity. Should a student be unsuccessful in tryouts for an activity and will not be participating in any other extracurricular activity for the year, said student will be removed from the eligible list, if applicable. Students who possess a valid parking permit will be considered a participant.

**Voluntary Consent Participant-** any student not involved in extracurriculars or parking on school grounds, but volunteered by parent/guardian to be subject to random drug testing.

**Hutsonville Random Drug Testing Committee-** The Board of Education and Administration will assign, evaluate, review and revise policy recommendations as needed. Members may change periodically throughout the life of the committee.

**Vendor-** medical office or company selected by the Committee and/or Board to provide services and/or supplies for the school district.

**Medical Review Officer-** licensed physician trained and certified in the process and interpretation of drug testing results.

**Illicit Substance-** a drug classified by the Drug Enforcement Administration (DEA) as being available only by prescriptions from a physician or classified as being controlled and having no therapeutic use.

**Banned Substance-** a substance defined by school policy as being banned from

use by students.

**Student-** any student participating in athletics, clubs, extracurricular activities, or having a valid parking permit.

**Adulterant/Adulteration-** any attempt to alter the outcome of a drug test by adding a substance to the sample, attempting to switch the sample, or otherwise interfering with the detection of illicit or banned substances in the urine or other testing, or purposefully over hydrating oneself in an attempt to dilute the urine to decrease possible detection of illicit or banned substances.

**Self-Referral or Self Reporting-** process of a student coming forward, voluntarily, seeking help for a problem with an illegal drug or alcohol. This is done before a violation of the Extracurricular Random Drug Testing Policy.

**Valid Parking Permit-** The permit is part of a system whereby students are granted permission to drive to school as a privilege. Those students who drive to school must possess and properly display a permit to park their vehicle at the school. Failure to obtain and/or display the permit on the rearview mirror in the vehicle will result in a warning. Further failure to display permit may result in the loss of parking privileges for a determined amount of days and/or a \$15 fine.

**Reasonable Suspicion-** there is reasonable suspicion when school officials reasonably infer from all the circumstances that the student is committing, is about to commit, or has committed an offense relating to the illegal use of alcohol or drugs. School officials must identify specific articulated facts which, when taken with their natural inferences, make the intrusion reasonable. The facts need not rise to the level of probable cause, but must be more than a hunch. A school official's search may be as thorough as required by the circumstances. Administration will make the determination as to whether reasonable suspicion exists. Staff or students may be responsible for referring information to the administration for review. Examples of, but not limited to reasonable suspicion include: 1) odor of marijuana or other suspicious substance in locker or in possession, 2) dangerous actions or behavior that could jeopardize safety of self or others.

**Counselor-** certified chemical dependency counselor.

### 3. Procedures for Students

- A. Informed Consent for Testing-** at the beginning of each school year, prior to tryouts or beginning of extracurricular activities, parent/guardian/custodian shall complete and sign the Extracurricular Random Drug Testing Policy Informed Consent Agreement (Exhibit A) ***No student may participate or drive to school until this form is properly executed and on file with the school principal.***
- B. Voluntary Consent for Testing-** before school and during registration, each parent/guardian of each student not involved in extracurriculars or parking on campus shall be offered to complete exhibit B which shall voluntarily include their child in the random student drug testing pool.
- C. Drug Testing Frequency-** No less than 2 students but no more than 10%. Students who refuses to submit to drug testing will not be allowed to participate in extracurricular activities or drive to school at Hutsonville High School.  
After testing, a student's number will be returned to the testing population and subject to possible re-selection during the next testing cycle.
- D. Sample Collection-** Samples will be collected as outlined in 5. A-C. Any eligible student who is not in school on the day of testing will result in the next number (alternate) being chosen. Students not able to provide an adequate urine specimen at the testing time will be unable to participate until the proper specimen is provided within 24 hours. Arrangements may be made for special collections at an approved medical facility with prior approval of the school principal or designee. Other testing that is valid and recognized, such as saliva swabs may be adopted as deemed necessary by Hutsonville CUSD 1 instead of urine sampling.

### 4. Confidentiality of Results

All drug test results are considered confidential information and will be handled accordingly. Information on a verified positive result will be shared on a need-to-know basis with the student's coach, athletic director, sponsor, or representative of that group, whichever is applicable. Only those persons will be notified after the principal or designee and the

parents/guardians have been notified, and after the lab has confirmed the results.

Negative results will be reported by phone and by mail to the parent/guardian of the student who was tested as soon as practical after the district has received such information.

## 5. Requirements

**A. Random Selection of Extracurricular, Parking Permit, and Voluntary Consent Students-** Once provided a list of eligible students, the school principal or designee in conjunction with the vendor will select the required number of students in a random and confidential manner. This shall be through a random computerized selection process with school personnel present to witness the selection process. The parent/guardian has a right to be present during his/her child's testing. In order to be present, Exhibit A must be completed and must have updated phone numbers for contact. In addition, testing shall be allowed to continue if all numbers are called and parent(s) are unable to be reached. Up to weekly, the vendor will arrange with the school principal or designee a day and time to do the collection of specimens.

**B. Collection of Urine Specimens-** The vendor will oversee the collection of specimens as outlined in Section 9 "Procedures for Random Drug Testing of Hutsonville Community Unit #1 Students." In the event that a student to be tested is a direct relative of personnel doing the testing, that tester shall abstain from that particular student being tested. Students will be given as much privacy as possible in the obtaining of the urine specimen. Collection personnel will take steps to ensure integrity, privacy, and the security of the specimen. The specimen will be collected in private (unobserved). It will be immediately checked for quantity, temperature, color, and appearance. Alternative testing, such as swabs may be conducted instead of urine testing, if approved by the vendor and school personnel.

**C. Testing of Urine Specimens-** The vendor will do onsite collection of all specimens for the specified illicit or banned substances. The following specific classes or substances may be tested: Amphetamines, THC, Cocaine, Opiates, and Phencyclidine, Barbiturate,

Benxodiazepines, Nicotine, Methadone, Propoxyphene- **9 panel drug screen**

**D. Statistical Reporting and Confidentiality of Drug Test Results-** The assigned vendor, other officials involved in the testing, or any other personnel knowing of testing results may not release any statistics of positive drug tests to any person, organization, news publication or media without expressed written consent of the Hutsonville Community Unit #1 Board of Education. The vendor shall work with the school district to provide reports showing the number of tests performed, rate of positive and negative tests, and what substances were found in the positive specimens.

**E.** Any testing information or test results shall be kept during the school year in a temporary file. Positive results will be kept for five years in a temporary file. No results shall be retained in a permanent file of any student. No testing information or results shall interfere with academic performance or graduation, except that of which is not associated within this policy. All temporary records shall be kept in accordance with the Family Education Rights and Privacy Act.

## **6. Procedures in the Event of a Positive Result**

### **A. First Positive Result** (within high school career)

1. Within 5 calendar days, the student must present proof of an appointment with a certified chemical dependency counselor for a chemical dependency assessment, then follow the recommendations of the counselor. If treatment is recommended, it must be a recognized chemical dependency program. The student must supply the school principal with documentation of completion of the appointment. **The student may resume participation when the following have been met:**
  - a. He or she shall provide the principal documentation of continued counseling program.
  - b. He or she has to submit a clean drug test.
  - c. Agreement to abide by the prescribed treatment procedures, of which the parent/guardian/custodian is responsible for all costs.

- d. Completion of requirements and/or penalties of the Hutsonville Community #1 Athletic Policy if applicable.
  - e. Serve a 1 consecutive school day suspension of parking privileges (For those with a valid parking permit.)
2. If student and/or parent or guardian refuses the procedures in (1) above, the student will be denied participation in extracurricular activities and/or driving privileges for **one calendar year from date of the refusal.**

**B. Second Positive Result** (within high school career)

The student will be required to meet with the chemical dependency counselor and participate and complete an approved substance abuse program (same as after first positive result). Documentation of completion of the counseling program shall be submitted to the school principal. The student will also be suspended from all extracurricular activities and/or driving privileges for **one calendar year from date of the positive test.**

**C. Third Positive Result** (within high school career)

The student will be required to meet with the chemical dependency counselor and participate and complete an approved substance abuse program (same as after first positive result). Documentation of completion of the counseling program shall be submitted to the school principal. The student will also be suspended from all extracurricular activities and/or driving privileges for **two calendar years from date of the positive test.**

**D. Subsequent Positive Result**

Subsequent positive results beyond a third positive testing during the high school career shall result in the suspension of participation in all extracurricular activities and parking privileges **indefinitely while enrolled or re-enrolled at Hutsonville High School.**

**E. Positive results shall become cumulative throughout grade 9-12 regardless of enrollment status being current or re-enrolled.**

**7. Non-Punitive Nature of Policy**

No student shall be penalized **academically** for testing positive for illegal drugs or banned substances. The results of drug tests pursuant to this policy will not be documented in any student's academic records. Information regarding the results of drug tests will not be disclosed to criminal or juvenile authorities absent legal compulsion by valid and binding court order or other legal process, which the Hutsonville Community Unit #1 Board of Education will not solicit. In the event of service of any such court order or legal process, the student and the custodial parent, legal guardian, or custodian will be notified at least 72 hours before response is made by Hutsonville Community Unit #1 Board of Education, to the extent permitted by such subpoena or legal process.

**8. Self-Referral/Self-Reporting**

Students (eligible for random drug testing) will be allowed to self-report or make a self-referral if they have not violated the Random Drug Policy or have not been selected for testing then decide to self-report. Once the student has been selected for drug testing, self-referral is not an option. Those who self-report **before** being selected to drug test will not be considered as violating and will not be denied participation except for a temporary suspension until a negative test is obtained. The student must submit to counseling, continued drug testing, and/or other requirements set forth by the counselor. If the student fails to follow the program and testing prescribed, it will then be considered the same as failure of the first positive criteria and fall into section 6. A.2. (student will be denied participation in extracurricular activities and/or driving privileges for the remainder of the current school year.)

**9. Procedures for Random Drug Testing for Hutsonville High School Students Participating in Extracurricular Activities.**

**A. List of Eligible Students**

The school principal or designee will prepare a list of eligible

student ID numbers participating in extracurricular activities or possessing a valid parking permit. This list will be provided to the vendor who will oversee/conduct the random selection of students who will submit specimens for testing.

#### **B. Random Selection of Student for Testing**

The school principal or their designee will use a computerized based system to assure that students are randomly selected for the testing process. This shall consist of student ID numbers so that confidentiality will be preserved. Alternates shall be selected as well, in case students are absent. School personnel may be present to observe the selection process.

#### **C. Scheduling of Drug Testing**

Drug testing will be conducted on a weekly, monthly, or seasonal basis. Testing can be conducted prior to each season for all participants in a particular sport, activity, etc. Also, if there is a reasonable suspicion by a coach or sponsor that is documented, reasonable suspicion must be confirmed by an administrator before a student may be tested.

#### **D. Form Completion**

Vendor will provide forms to be signed in advance. This will be completed during the school registration process. Only the student ID number will be put on the completed form. All forms will be returned to the building principal.

#### **E. Collection Process**

Selected students will be escorted from class to the selection site by school personnel assigned. A specimen of urine will be collected by the assigned vendor personnel. **Parent/guardian may be contacted if desiring to be present during the testing of their child. If so, Exhibit A should be completed with updated phone numbers for contact. If all attempts are exhausted and the parent/guardian cannot be contacted, the testing shall proceed with that student as normal.**

1. Student will be asked to document what current medications (including over-the-counter) he or she is taking or has taken

recently. **The student is not required to reveal this information. IF there is a positive test, this information must be submitted to the Medical Review Officer.**

2. No purses, bags, or containers may be taken into the collection area with the student. All coats, jackets, sweaters, etc., are to be removed before entering the collection area.
3. Vendor personnel will open the drug kit in the presence of the student.
4. Vendor personnel will add a bluing agent to the water in the urinal or toilet to be used and will secure the restroom to prevent tampering.
5. Students will be asked to wash, rinse and dry hands prior to collection of specimen. If no water is easily accessible, a non- alcoholic wipe may be used instead.
6. The Drug Testing Custody and Control Form are completed by the student and collector.
7. The student is directed to urinate into the provided container and shall provide a sufficient amount of urine in one attempt. The student will enter a private restroom to provide the specimen, and will hand the container to the collector. **Do not flush the toilet.** The student will then wash his/her hands for sanitary purposes. The toilet will then be flushed.
8. Vendor personnel will check the volume and temperature within four minutes of collection and will check for tampering. If tampering is suspected, a second specimen will be requested. A second tampered specimen will be considered a refusal **to test** and the principal will be notified.
9. With the student watching, the collector will take the properly signed and initialed bottle seals and place them over the caps and sides of the bottle.
10. The sealed bottle is placed inside a bag. The drug testing custody and control form is placed inside the bag. The bag is then sealed.

**F. Medical Review Officer Responsibilities-** this physician shall agree to cooperate with the vendor and school personnel in the event of a positive result of a drug testing. The physician shall agree to cooperate in reporting any findings that may agree or disagree with the school testing results.

- (1) The MRO may determine if any discrepancies have occurred in the testing process.
- (2) Depending upon the substances found, the MRO may contact the parent/guardian/custodian/student to determine if the student is on any prescribed medication.
- (3) If the student is on medication, the parent/guardian/custodian/student will be asked to obtain a letter from the prescribing physician within five working days to document what medications the student is currently taking. Failure to provide such requested information will be considered a positive result.
- (4) The MRO will then determine if any of the prescribed medications resulted in the positive drug screen. Based on the information given, the MRO will certify the drug test results as positive or negative and report this to the parent/guardian/custodian/student and the school principal or designee, initially reporting positive results by phone.
  - a. For example, a drug screen positive for codeine may be ruled negative by the MRO when he receives a letter from the treating physician that the student has been prescribed Tylenol with Codeine as a pain medication following tooth extraction.
  - b. Drug screens for illicit drugs (marijuana, heroin, cocaine, or alcohol, etc.) will automatically be considered a positive.

#### 10. **Procedures in the event of Tampering, Adulteration, or Altering Results**

Whenever a student's test results indicate the student tampered, adulterated, or otherwise altered the specimen, it will be considered the same as a first positive result. The procedures outlined above in section 6 "Procedures in the Event of a Positive Result" will take effect.

#### 11. **Financial Responsibility**

Under this policy, Hutsonville Community Unit #1 will pay for all initial drug tests as outlined in the procedures above. Any additional testing the parent/guardian/custodian/student desires to do on their own becomes the financial responsibility of that family. Counseling at a licensed substance abuse treatment program is the responsibility of the student's parent/guardian.

Exhibit A

**Hutsonville CUSD 1  
EXTRACURRICULAR RANDOM TESTING POLICY  
Informed Consent Form**

**As a student:**

- I understand and agree that participation in extracurricular activities or driving to school is a privilege that may be withdrawn for violations of the Hutsonville CUSD 1 Extracurricular Random Drug Testing Policy.
- I have read the Policy and thoroughly understand the consequences I will face if I do not honor my commitment to the Policy.
- I understand that when I participate in any extracurricular activity or possess a valid parking permit, I will be subjected to random drug testing, and if I refuse, I will not be allowed to participate in any extracurricular activities or drive to school and park on school property.
- I understand this is binding while a student at Hutsonville CUSD 1.

**As a parent/guardian/custodian:**

- I understand that I have the right to be present during testing of my son or daughter, and that I will list below all current contact numbers and options to be reached. I understand that I may waive these rights. If I choose to be contacted, school personnel will attempt all contact numbers to notify me of testing. If all attempts are exhausted with no contact, I will allow testing to proceed as normal within the limits of this policy.
- Hereby consent to allow the student named below to undergo drug testing for the presence of alcohol, illicit drugs, or banned substances in accordance with the Hutsonville CUSD 1 Extracurricular Drug Testing Policy as approved by the Hutsonville CUSD 1 Board of Education.
