Background

Hearthstone serves approximately 220 students in TK-12 throughout Butte County and all contiguous counties.

Hearthstone provides students the opportunity to complete much of their learning at home. With the guidance of a credentialed teacher, students complete assignments working 4-6 hours per day depending on the student’s grade level.

Assignments target grade level and Common Core standards and are individualized based on the student’s academic needs. Parents play an essential role in the facilitation and monitoring of the student’s daily assignments as outlined on their learning plan. Communication between the parents, student and the teacher is vital to ensure that students have the support they get the most out of the learning experience.

Educational Options

For all options, parent/teacher meetings are held regularly to monitor and support student progress. A variety of web-based educational programs may be used to support student learning.

INDEPENDENT STUDY TK-12
Student completes assignments at home with parent instruction and support daily. Attendance in math class is highly recommended TK-8 and required in high school. Students may choose to attend elective classes.

HYBRID TK-12
Hybrid - In addition to students working at home, they attend on-site classes two days a week (TK-8) or three days a week (9-12). Core academics and elective classes are offered.

ONLINE 9-12
Students complete assignments daily using Edgenuity, an online curriculum. Students take tests and receive teacher support in the Campus Learning Center. Attendance in math class is required.
