### Physical Activity & Achievement

Schools play a crucial role in influencing physical activity behaviors. Sound curriculum, policies, and facilities create an environment encouraging students and staff to engage in a variety of physical activity opportunities. Evidence supports a correlation between SAT scores and the physical well-being of students.

### Nutrition & Physical Activity Report Card

2016 - 2017

The Lawrence County Schools are dedicated to serving nutritious meals and providing multiple physical activity opportunities as a means of helping our students reach proficiency.

## National School Lunch

The National School Lunch Program (NSLP) was conceived in 1946 as a “measure of national security to safeguard the health and well-being of the Nation’s children.” School districts receive federal reimbursement for each school lunch served that meets the United States Department of Agriculture nutrition guidelines. These guidelines promote meal quality while commodity donations help the farmer and help schools keep down meal prices.

Our lunch meals are planned on a four-week menu cycle. Federal regulations require that we offer minimum portion sizes of meat, fruit and/or vegetable, grains/breads and fluid milk during every lunch meal service. The portion sizes are designed to meet the needs of growing children and, as a rule, we increase the sizes as the children grow older. We make a concerted effort to offer whole grain breads as well as fresh fruits and vegetables every day. Students are allowed to serve themselves all the fresh fruits and vegetables they will eat. The menu cycle provides for variety and allows us to make the most efficient use of the donated commodities, especially seasonal fresh fruits. We offer 1% and skim milk, as well as 100% fruit and vegetable juices.

The table below provides a synopsis of the lunch program, including participation and financial data for 2015-2016.
