## **SCHOOL DISTRICT STATEMENT ON EDUCATION**

# **Destination...Excellence 2022**

## **Andes Central School District Strategic Plan**

### **FY 2018-2022**

The mission of the Andes Central School District is to cultivate the potential in every student so that they strive to build strong relationships, become future ready, and embrace the full richness and diversity of our community.

The Andes Central School District School Board spent time developing, with the input of multiple stakeholder groups, the foundation for the Destination...Excellence 2022 Strategic Plan. The foundation identifies what students within the educational system will be able to do upon graduating from our district. There are three pillars which will support the efforts outlined within the Destination...Excellence 2022 Strategic Plan. These are the foundation for growth.

### **Building and Maintaining Relationships**

Relationships are at the heart of this plan. Without building and maintaining strong relations between and among students, staff, caregivers, and community, the District will fall short of providing exceptional services. These relationships are strengthened when diversity is understood; clear, purposeful, and respectful conversations are held, and recognitions are given. This will allow for an atmosphere of trust and security to be built.

### **Preparing Future Ready Students**

The Andes Central School community realizes that the world is ever changing. Without providing innovative and technology rich learning opportunities, students will not be adequately prepared for what the future has to offer. Technology tools will assist students in developing personalized learning plans that will enhance learning opportunities.

A strive for excellence begins when students first walk through our doors, and our responsibility does not end when they exit upon graduation. Providing opportunities for students to explore their environment, learn about their community, and set goals that are individualized will help to increase self-esteem

and motivation. This also charges the District with constantly exploring curriculum options that meet student and community needs.

During their educational journey students will be exposed to the “Four Cs” that will help to prepare them for success in a global society. These “Cs” are critical thinking and problem solving; communication; collaboration; and creativity and innovation. These skills will be built into students’ daily activities.

The next step in preparing students to become future ready is to ensure that they are able to explore and experience career possibilities. Opportunities for this to happen will be given throughout their educational journey.

**Respecting the Heritage, Values, and Cultures of All**

The Andes Central School District will “seek and develop the knowledge, skills, and attitudes that demonstrate openness and authentic responsiveness to the heritage, values, and expressions of each cultural group represented within” the District. (*The Culturally Proficient School: An Implementation Guide for School Leaders*, Randall Lindsey, Lorraine, Roberts, and Franklin Campbell Jones)

This will be done by creating a system wide plan for transforming the schools, and classrooms into places that truly support ALL students in achieving their highest levels. This cannot be accomplished in isolation however, and parent/community involvement is critical.

Through input from stakeholders, the District was able to formulate a highly-structured strategic plan. We are excited about the future – of our District, our community, and most importantly, the students who daily bring us their limitless potential.

The District has created performance measures, strategies, and initiatives to ensure success in each goal area. Data collection and monitoring processes will be implemented to evaluate progress toward meeting identified goals. Programmatic reviews will be utilized to develop the targets and initiatives and will continue to be used in the evaluation process.

As a community of learners, we are committed to excellence in everything we do within the classroom and throughout the District. This continuous improvement process permeates each aspect of our Destination...Excellence 2022 Strategic Plan, and we are honored to partner with you to make it a reality for all.

### **Continuous Improvement**

As a result of the work that has been done, three goal areas have been established. These three goals will guide the District throughout the Destination...Excellence 2022 campaign. These goals are to:

- create environments which foster positive relationships;
- prepare young adults for future life endeavors; and
- embrace and celebrate the heritage, values and cultures of all.
