

Andes Central School District	NEPN Code: GCBDF
Policy Manual	Page 1 of 1

NURSING MOTHERS

The District recognizes that breastfeeding is the most healthful, natural and economic method of infant nutrition, and it is the policy of the District to support the needs of breastfeeding mothers when they return to work.

1. Maternity leave planning will address the transition from full-time maternity leave to fulltime work and the impact that this may have on breastfeeding. Generally, maternity leave is a sufficient time to establish breastfeeding. Factors to consider include a combination of full-time and part time maternity leave, a flexible work schedule to accommodate breastfeeding needs, and break times to use a breast pump at work.
2. Breastfeeding employees are allowed a flexible schedule for nursing or pumping, with the schedule to be determined by the employee and employee's supervisor. The schedule requested by the employee will be approved unless the employee's supervisor has determined, in writing, that the requested schedule would impose an undue hardship by causing the District significant difficulty or expense when considered in relation to the size, financial resources, nature, or structure of the school district. Factors to determine when considering the schedule as proposed by the employee include, but are not limited to the following: the time requested would exceed the normal time allowed for lunch, breaks, student responsibilities at the time requested, sick/personal and annual leave, and adjustment of normal work schedule.
3. The District shall provide an appropriate room, other than a bathroom, for an employee to express breast milk where;
 - a. nursing women can nurse an infant brought in during lunch or breaks;
 - b. nursing women can pump breastmilk to be stored for later use. (Each employee is responsible for proper storage of her milk using a personal storage cooler);
 - c. the area for breastfeeding or pumping is located where a crying infant will not be disruptive to other employees;
 - d. accessible electrical outlets for electric breast pump use and a sink close by with a clean, safe water source for hand washing and rinsing out breast pump equipment; and
 - e. a comfortable chair and a table or desk is available for pumping;
