

# Using a Flexible Spending Account is like giving yourself a pay raise!

A flexible spending account (FSA) allows you to set aside a portion of your salary, before taxes, to pay for qualified medical or dependent care expenses. Because that portion of your income is not taxed, you end up with more money in your pocket.

## **\*Medical Spending Account\***

Set aside money to pay expenses not covered by your medical insurance.

- Use it to pay for things like coinsurance, prescriptions, eye ware and medical equipment.

## **\*Dependent Care Spending Account\***

Deduct a portion of your paycheck to use for dependent care for children up to age 13, a disabled dependent of any age or a disabled spouse. To be eligible for this type of account, both you and your spouse (if applicable) must work, seeking work or be full-time students.
