

PRINCIPLES

The board strives to provide safe, orderly and inviting schools for students and staff. The board also strives to provide other facilities needed to support the educational program. Long-range planning by the board and superintendent is essential for providing an educational environment where students can succeed.

LONG-RANGE PLAN

The long-range plan will identify facility needs of the school district. The plan will consider whether to renovate existing facilities or build new facilities. The plan also will consider creative options for meeting the needs of the educational program such as expansion or reduction through modular construction, future alternative uses of space, the availability of community facilities, the use of temporary facilities or leasing arrangements, and sharing facilities with other school districts.

PROCESS

The following information will be considered in long-range planning efforts.

- Data which reflect the possibility of enrollment declines or increases as well as other demographic changes in the population of students that are or may be served.
- A facilities inventory which includes the size of sites, building capacities, age of buildings, energy consumption, ability to utilize technology, the suitability of the space for its current or future purpose, and accessibility by the community.
- The availability or anticipated availability of innovations in construction or design that would allow existing buildings to be renovated or new facilities constructed at a lower cost, in a more energy efficient manner, or in a way which will better meet the needs of the educational program.

The superintendent may utilize the services of consultants to obtain information necessary for the long-range planning process. All professional contracts must be approved by the board. School staffs, students and parents will be involved in considering the needs for new and renovated facilities.

The board will work with the board of county commissioners when possible in developing a five year capital outlay plan. The plan will be reviewed each year and necessary changes will be brought

to the attention of the county commissioners during the budget development process. The board and superintendent will communicate in a positive and persuasive manner the need for school construction to the public and other governmental bodies in order to receive necessary funding.
