

# Chartwells Nutrislice Menus

## [School Menus](#)

***Research shows that parents and students want more information about the foods kids eat at school!***

Meramec Valley R-III Food Service, in partnership with Chartwells K12, will begin implementing Nutrislice, a new interactive website to publish school menus. Nutrislice includes a free smartphone app that will allow you to access menus anywhere, anytime! The new website will be phased in over the first few months of school with paper menus and the current link to paper copy online, along with the paperless “green” process.

*Note:* Upon individual household request the school building secretary can print a paper copy if electronic access unavailable.

Features and advantages of the Nutrislice website include:

- Easy accessibility: Dynamic school menus visible wherever families may be via district-specific websites and a free smartphone app, supported on [Apple](#) and [Android](#) devices (search Nutrislice).
- Engaging: Colorful, simple presentation of foods and detailed descriptions to allow families to plan balanced meals throughout the day.
- Informative: A special allergy filter to help families dealing with food allergies and special diets explore lunch options.

For additional information about the program contact the Michelle Dawson, Assistant Director of Food and Nutrition:
