**6034**

**Concussion Awareness**

10 The Nebraska Unicameral has found that concussions are one of the “most  
11 commonly reported injuries in children and adolescents who participate in sports  
12 and recreational activities and that the risk of catastrophic injury or death is  
13 significant when a concussion or brain injury is not properly evaluated and  
14 managed.”

15 The School District will:

16 a. Require all coaches and trainers to complete one of the following on-line  
17 courses on how to recognize the symptoms of a concussion or brain injury  
18 and how to seek proper medical treatment for a concussion or brain injury:

- 19 • Heads UP Concussions in Youth Sports
- 20 • Concussion in Sports—What You Need to Know
- 21 • Sports Safety International
- 22 • ConcussionWise
- 23 • ACTive™ Athletic Concussion Training for Coaches; and

24 b. On an annual basis provide concussion and brain injury information to  
25 students and their parents or guardians prior to such students initiating  
26 practice or competition. This information will include:

- 27 1 The signs and symptoms of a concussion;
- 28 2 The risks posed by sustaining a concussion; and
- 29 3 The actions a student should take in response to sustaining a  
30 concussion, including the notification of his or her coaches.

31 A student who participates on a school athletic team must be removed from a  
32 practice or game when he/she is reasonably suspected of having sustained a  
33 concussion or brain injury in such practice or game after observation by a coach  
34 or a licensed health care professional who is professionally affiliated with or  
35 contracted by the school. The student will not be permitted to participate in any  
36 school supervised team athletic activities involving physical exertion, including  
37 practices or games, until the student:

38 a. has been evaluated by a licensed health care professional;

39 b. has received written and signed clearance to resume participation in  
40 athletic activities from the licensed health care professional; and  
41  
42

- 43 c. has submitted the written and signed clearance to resume participation  
44 in athletic activities to the school accompanied by written permission to  
45 resume participation from the student's parent or guardian.  
46

47 If a student is reasonably suspected after observation of having sustained a  
48 concussion or brain injury and is removed from an athletic activity, the parent or  
49 guardian of the student will be notified by the school of:

- 50  
51 a. the date and approximate time of the injury suffered by the student,  
52  
53 b. the signs and symptoms of a concussion or brain injury that were  
54 observed, and  
55  
56 c. any actions taken to treat the student.  
57

58 The school district will not provide for the presence of a licensed health care  
59 professional at any practice or game.  
60

61 School officials shall deem the signature of an individual who represents that  
62 he/she is a licensed health care professional on a written clearance to resume  
63 participation that is provided to the school to be conclusive and reliable evidence  
64 that the individual who signed the clearance is a licensed health care  
65 professional. The school will not take any additional or independent steps to  
66 verify the individual's qualifications.  
67

68 Students who have sustained a concussion and returned to school may need  
69 informal or formal accommodations, modification of curriculum, and monitoring  
70 by medical or academic staff until the student is fully recovered. The school's  
71 "return to learn protocol" shall be the guidance provided by the Nebraska  
72 Department of Education entitled "Bridging the Gap from Concussion to the  
73 Classroom," and the accompanying materials and future supplements. Nothing  
74 in this policy or the referenced protocol shall entitle a student who has sustained  
75 a concussion to an individualized plan under Section 504 of the Rehabilitation  
76 Act, although staff will refer students who have sustained a concussion for  
77 evaluation under Section 504 as appropriate.  
78

79  
80 Adopted on: May 8, 2012

81 Revised on: August 12, 2014; November 14, 2017
