NORTH BRUNSWICK, N.J. 08902**

**(732) 289-3033
Fax: (732) 297-8567**

**TO: All Substitute
FROM: Office of Human Resources
SUBJECT: Mantoux (Tuberculin Test)**

A Mantoux (tuberculin test) is required in order to teach in New Jersey Schools. All employees who are tuberculin negative need not be tested. All positive tuberculin reactors (Mantoux confirmed) shall be required to have a chest X-Ray. If the chest X-Ray is negative for evidence of active tuberculosis, chemoprophylaxis or preventive therapy with one year of isoniazid is recommended.

If you have had a negative Mantoux test within the previous six months, you must submit proof to this office or have this form verified by the physician, clinic or nurse who administered the test. An employee transferring between New Jersey school districts would not have to be retested if there is a documented record from the New Jersey school of a Mantoux test.

PLEASE NOTE: If this form does not accompany the attached application, you will not be approved for substitute work.

NAME OF SUBSTITUE _____

DATE OF LAST (MANTOUX) TUBERCULIN TEST _____

REACTION: NEGATIVE _____ **POSITIVE** _____ **SIZE** _____
